Team Training

Dynamic Events Team Training workshops are designed to boost your team's performance through hands-on learning and development. Our programs, grounded in experiential learning, are customised to build high performing teams.

Before Mars:

Before Mars is a hands-on business simulation designed to sharpen problem-solving, strategic thinking, and execution skills. No team has ever achieved a perfect score—can yours be the first? The challenge is set: break down silos, improve teamwork, and gain a competitive edge.

Companies use Before Mars to build key team capabilities through real-world learning. This interactive programme pushes teams to work towards shared goals, applying practical skills to workplace challenges. Participants review their decisions, gaining insights they can use straight away to drive real results.

What to Expect:

- **Strategic Scenarios:** Tackle complex business challenges that demand planning and strategic thinking.
- **Decision-Making Tests:** Make critical choices with real consequences, mirroring workplace decisions.
- **Team Collaboration:** Strengthen communication and coordination to execute strategies effectively.
- **Performance Feedback:** Get detailed insights on decisions, highlighting strengths and areas to improve.

Code Breaker:

Code Breaker is a unique team-building activity rooted in experiential learning. Participants engage in real-time problem-solving through interactive puzzles and complex code-breaking tasks. This approach helps teams improve analytical skills, boost communication, and strengthen collaboration by learning through experience.

Developing Analytical Skills Through Experiential Team Training

Our structured Code Breaker programme guides participants through a progressive problem-solving journey, designed to enhance analytical and critical thinking skills:

Briefing: The Event Manager provides teams with a full overview of the activity, setting clear objectives and encouraging strategic thinking from the outset.

Challenge: Teams work together within a set timeframe to solve intricate puzzles and decode complex codes. These activities are designed to improve analytical thinking and encourage collaborative problem-solving.

Success: The winning team unlocks the final code, showcasing their ability to apply critical thinking and teamwork under pressure. This achievement strengthens decision-making and group problem-solving skills, with direct applications in the workplace.

Code Crackers:

Code Crackers is an interactive workshop designed to build teamwork, critical thinking, and problem-solving skills in a fast-paced, engaging way. Led by an experienced facilitator, this corporate challenge brings teams together to tackle problems, spark creativity, and improve collaboration—perfect for organisations looking to strengthen team dynamics and inspire fresh ideas.

Your team will take on a series of interactive tasks that require cooperation and practical thinking. Participants work together to solve clues, complete challenges, and use an app to submit answers as they progress. With expert guidance, each stage keeps energy high and

minds engaged. The session finishes with a reflective debrief, helping teams connect their experience to real-world challenges.

What to Expect:

- Creative Problem-Solving: Tasks encourage teamwork, critical thinking, and fresh approaches.
- Inclusive & Engaging: Suitable for everyone, from new hires to senior leaders, with a facilitator ensuring full participation.
- Workplace Relevance: Lessons learned translate directly into better teamwork and decision-making at work.
- Reflective Debrief: A structured wrap-up helps teams apply their insights to everyday challenges.

Detour:

Detour is a hands-on change management training experience, where every twist is an opportunity for growth. Designed for today's fast-paced business world, Detour combines adaptability workshops, business simulation training, and team resilience training into one dynamic programme. Guided by our expert facilitator, each session starts with a briefing to prepare participants for the journey ahead.

Through interactive puzzles, individual tasks, and team-building challenges, participants learn to adapt and thrive amid constant change—an essential skill in today's corporate landscape. This professional adaptability

training is suited for teams looking to build resilience and flexibility.

Key elements include:

- Real-time adaptation to shifting priorities
- Strategic resource management for efficient outcomes
- Collaborative problem-solving to build resilience

Dome Works:

In today's fast-paced business world, teams need practical skills and strong collaboration to excel. That's where Dome Works comes in. Designed as an experiential learning activity for corporate team development, Dome Works combines hands-on team building with a focus on strategic thinking, effective communication, and problem-solving—skills that matter for real-world success.

Dome Works begins with an orientation that sets the stage for an engaging, time-based team building challenge. Teams come together to build their own Dome—a team construction activity that tests coordina-

tion, planning, and decision-making under pressure. This interactive team training experience encourages clear communication and strategic teamwork as the clock ticks down.

After the first round, teams regroup and review their approach in a collaborative problem-solving workshop. In this second phase, they adjust their strategies and attempt a rebuild, putting fresh ideas to the test. This second round of building fosters team strategy development and strengthens collaborative project skills while keeping the activity both challenging and enjoyable.

Mission to Mars

Mission to Mars: Virtual Team Training Workshop is a fully virtual, online event designed specifically for remote teams. This unique experience combines virtual team-building exercises with the excitement of a simulated teamwork challenge, encouraging participants to step outside their comfort zones, communicate effectively, and strengthen essential problem-solving skills in an interactive setting.

In this virtual experience, each team member receives different pieces of information, making cooperation essential. Teams must communicate and share knowledge to solve each puzzle with speed and

accuracy. This structure mirrors real-world challenges, emphasising group decision-making and team collaboration. Through these challenges, participants gain hands-on experience in problem-solving and adaptability, which are vital for thriving in a remote work environment.

Flexible Levels for Engagement:

The workshop includes four distinct levels, each introducing different activities that keep participants engaged and progressing. Teams can choose to experience this as a one-off virtual event, or integrate it into a broader team development programme.
